M.Hesam moradian

front-end developer

About me

Mohammad Hesam Moradian, computer science student and web developer

"With a great passion and determination to learn and develop web software, I am seeking job opportunities to enhance my experience and skills in this field. Through online courses on platforms such as SoloLearn, I have become proficient in HTML, CSS, and JS and have completed various practice projects using these languages. Additionally, I am currently learning React.js and Bootstrap 5, which are popular and widely-used frameworks in web development. I enjoy working in a team and can collaborate with different individuals. I am eager to participate in exciting and challenging projects and demonstrate my creativity and innovation."
